## MAC Address ?

Diagram illustrating the structure of a MAC address (Media Access Control address). The address is 48 bits long, divided into two main sections: a 16-bit OUI (Organizationally Unique Identifier) and a 32-bit MAC (Media Access Control) field. The OUI is highlighted in red and labeled '16' and 'OUI'. The MAC field is labeled 'MAC Media Access Control' and '32'. The entire field is labeled 'ID' at the end.
